

Guest on the [8/11/21](#) show, J. Marvin Herndon, shares a set of graphics to accompany his presentation:

Coal Fly Ash Chemtrails: Clockwise from Upper Left: San Diego USA; Karnack, Egypt; London, England; Vermont USA (also carbon black chemtrail); Luxembourg; Jaipur, India.

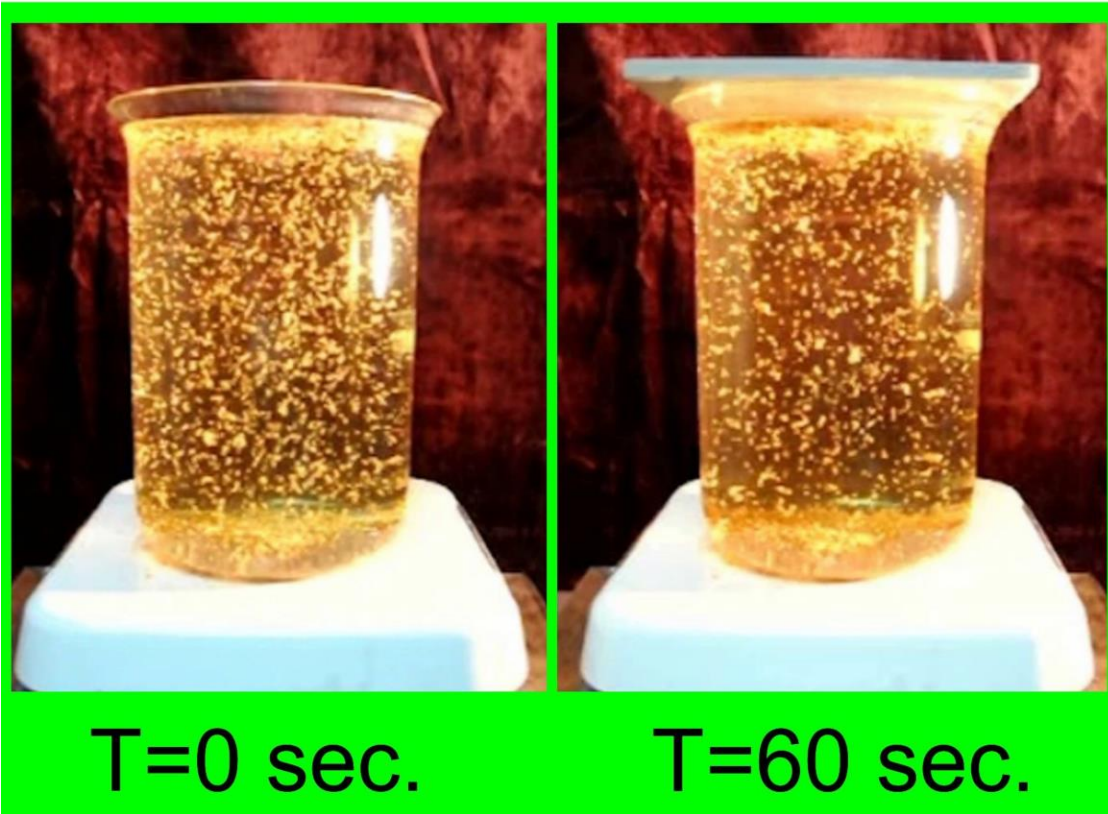

Some of the Many Toxins Extracted into Rainwater by Coal Fly Ash Chemtrails

Atmospheric Convection Moves Heat From the Atmosphere Bottom to the Top of the Lower Atmosphere.

Aerosol Particles Absorb Sunlight and Transfer Heat to Top of Lower Atmosphere, Reducing the Temperature Difference and Reducing Convection Heat Transport.

Consequence: Global Warming

Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, a.k.a. ENMOD, is a *Trojan horse*.

United Nations ENMOD Treaty:

- Does NOT prohibit “hostile” environmental modification
- Does NOT prohibit “peaceful” environmental modification
- DOES Mandate: *“States Parties ... shall contribute, alone or together with other States or international organizations, to...co-operation in the preservation, improvement and peaceful utilization of the environment.”*

United Nations ENMOD Treaty defines “*environmental modification techniques*” as any technique for changing – through the deliberate manipulation of natural processes – the dynamics, composition or structure of the Earth, including its biota, lithosphere, hydrosphere and atmosphere, or of outer space.

Environmental modification is not peaceful. ENMOD is a *Trojan horse* pseudo-legal justification for **GLOBAL ENVIRONMENTAL WARFARE**.
